

- what do I want to learn or understand better?

This was the last sprint and I can't really say anything specific I want to learn right now. I do feel that I've learnt a lot during this course but yet basically everything that this course touched on are things that I still need to improve. Such as the agile / scrum process, writing better user stories, clearer acceptance criteria, being a better team mate, system architecture, design, and more.

- how can I help someone else, or the entire team, to learn something new?

Again as the last sprint is finished I find it hard to answer this.

- what is my contribution towards the team's use of Scrum?

Same as last week, I have participated in all our scrum meetings, daily checkups, and created user stories and all things that entails. I was officially PO this week but we did things differently this week, and ended the sprint with all of us together at our clients premises.

- what is my contribution towards the team's deliveries?

I completed all my user stories and participated in all meetings as well as contributing to the team reflection.
