

Individual reflection

Simon Holst

Week 6

what do I want to learn or understand better?

I want to get a greater understanding of User Stories and how to accurately assess their effort. Starting from next week, we are going to change our approach and estimate after all tasks and acceptance criterias are done. I hope to get a better at estimation as well as refining our way of using the agile practice.

how can I help someone else, or the entire team, to learn something new?

Another way of connecting the way we work we intend to dedicate half an hour each week to demonstrate what we worked with that week and how it was implemented. I think it will increase my overall understanding of the application and possibly increase velocity, while working with code that is not my own work.

what is my contribution towards the team's use of Scrum?

This week I attended all meetings and tried to partake actively in our debates and decisions. In the future I will continue to actively engage in meetings in order to get a better understanding of our way of adapting an agile project workflow.

what is my contribution towards the team's deliveries?

This week I spent most of my time either refactoring our proof-testing of our application.
