

Individual Reflection

Week 8

What do I want to learn or understand better?

The coming week we will reflect on our work as a group and our use of scrum. From this I want to learn what's good to think about for future group projects. In addition to what we have already learned continuously during the course.

How can I help someone else, or the entire team, to learn something new?

Be active in working with the final reflection and share my perspective.

What is my contribution towards the team's use of Scrum?

I have participated in our sprint meetings and worked on delivering a shippable product.

What is my contribution towards the team's deliveries?

Worked on our app. Implemented new things and changed existing ones according to our clients wishes. Example offline functionality and soft keyboard handling
