

# Individual Reflection Week8

Emma Stålberg 220520

## **What do I want to learn or understand better?**

During the entire project, I have continuously researched about how to work with scrum and reflected on how it could be used in the best way. I think that I have a lot more to learn about this. Now, I want to learn even more on how one can use the scrum process to work more efficiently, in order to improve projects in the future. To achieve this, I am going to reflect on our work, individually and together with my teammates. I hope that our reflections for example will help us see what can be improved, changed or kept for our upcoming projects.

## **How can I help someone else, or the entire team, to learn something new?**

I try to share my knowledge and I try to answer questions when I am able to. Furthermore, it is good when we sit together on campus, since it makes it easier to ask for help as well as to help each other.

## **What is my contribution towards the team's use of Scrum?**

I have participated in all of the meetings and I have, together with my teammates, contributed to the sprint planning, sprint review, team reflection, user stories, the backlog and so on.

## **What is my contribution towards the team's deliveries?**

I have tried to help my team members when I could. I have also completed my assigned user stories. Furthermore, I have participated in meetings.
