

Individual Reflection – Week 7

Philip Winsnes

What do I want to learn or understand better?

As we are starting to approach our deadline not much is yet to be discovered. We are going to implement push notifications and it might be interesting to get an understanding of how to implement them in an app.

How can I help someone else, or the entire team, to learn something new?

As described in last weeks, I try to take my time to do the best I can of helping others. I will do that by giving my best explanations and try to work along with others outside my work to be as available as possible.

What is my contribution towards the team's application of Scrum?

This week I have been product owner along with Fanny. This is the third time I have been PO. Along with the responsibilities that come with being PO, I've also helped developed the app by completing user stories and participated in meetings.

What is my contribution towards the team's deliveries?

I have always worked in pairs with others in the group. I have redesigned the home screen, added a splash screen and loading indicators for some states of the app.
