

**- what do I want to learn or understand better?**

I want to learn how to communicate with our clients API and how Android uses SQLite and Room. Android provides great documentation which I intend to read. The goals of last week still stands as well as.

**- how can I help someone else, or the entire team, to learn something new?**

Same as last week.

**- what is my contribution towards the team's use of Scrum?**

We haven't had any scrum meetings yet.

**- what is my contribution towards the team's deliveries?**

I took part in the meetings we had on Monday and on Thursday where our external actor also was present. I also took part in constructing the business canvas model. I tried to set up my colleagues as well as possible because I was not able to take part in some of the weeks work because I had to travel away for personal reasons this week. I was lucky to be able to rely upon my team this week!
