- what do I want to learn or understand better?
I'm not entirely sure of what the individual parts of scrum entails. My goal is to be able to clearly explain it to someone
not familiar with agile. To achieve this goal my plan is to do some reading on the topic and gain practical experience from
next week's exercises.

- how can I help someone else, or the entire team, to learn something new?
I'm not sure how to answer this yet as it will depend on what we decide to do. If it's something im experienced in then
I can share my knowledge and the resources I used to get there. Hope my team will do the same.

- what is my contribution towards the team's use of Scrum?
Setting up the meeting to create the social contract and actually contributing to the contract.

- what is my contribution towards the team's deliveries?
I wrote a little in the social contract and took part in the discussion. Also pitched an idea for a project.
