Individual Reflection – Week 1

Amanda Cyrén

What do I want to learn or understand better?

I would like to learn more about how to work with Scrum in an efficient way and how all the processes of a sprint are organized. I also want to develop a better understanding of how the process of software engineering is in the industry and how to best work in a group of people to achieve the desired outcome.

How can I help someone else, or the entire team, to learn something new?

By being open-minded and inclusive I believe that we can all learn from each other. We will certainly have diverse knowledge and experience and I think that the learning process from each other will benefit from the group having an open communication about what we find difficult or unclear. I hope to be able to contribute with help where needed or a resource to progress.

What is my contribution towards the team's application of Scrum?

This week we haven't really started with Scrum yet, but I hope to be able to contribute by learning the process of Scrum and get a good understanding of how it works. Taking part in the workshop was a step to achieve this.

What is my contribution towards the team's deliveries?

This week's delivery was the social contract and I've taken part in the forming of it and in general discussions about the project.
