# Individual reflection

Simon Holst
Week 3

**what do I want to learn or understand better?**
Now that I have gotten an introduction to Android Studio and how the fundementals work I would like to learn about more intricate issues. My intention is to watch educational content during spring break in order to more easily begin with individual tasks next sprint.

**how can I help someone else, or the entire team, to learn something new?**
By becoming more familiar with Android Studio I hope to be able to assist my team in issues better discussed between two members.

**what is my contribution towards the team's use of Scrum?**
In mondays meeting, I helped writing User Stories, tasks and acceptance criterias in order to structure the first sprint as best as possible. As this week's Scrum Master I scheduled our zoom meetings.

**what is my contribution towards the team's deliveries?**
This week my deliveries probably weren't as prominent as future deliveries, as I mostly participated in workshops and getting familiar with the technologies we work with.
