Individual Reflection Week6

Emma Stålberg 220506

What do I want to learn or understand better?
I want to learn more about how to repopulate the screens and how to implement this in the best way, since it can have many different solutions.

I have researched a lot about scrum and the scrum process and realized that we might need to change a little bit in how we work with some things (for example estimating user stories). I have tried to talk about some of what I have learned with the team, and tried to see how we could make our team work even better.

How can I help someone else, or the entire team, to learn something new?
I try to share my knowledge and I try to answer questions when I am able to.

What is my contribution towards the team's use of Scrum?
I try to continuously research about how to work with scrum and I try to come up with some complementary ideas on how we could work with some things during the upcoming sprints that hopefully will help us forward. I have also participated in meetings and contributed to the sprint planning, user stories and so on.

What is my contribution towards the team's deliveries?
I have tried to help my team members when I could. I have completed my user stories. I have participated in meetings.
